

Current situation: Sustainability

Q3 2022

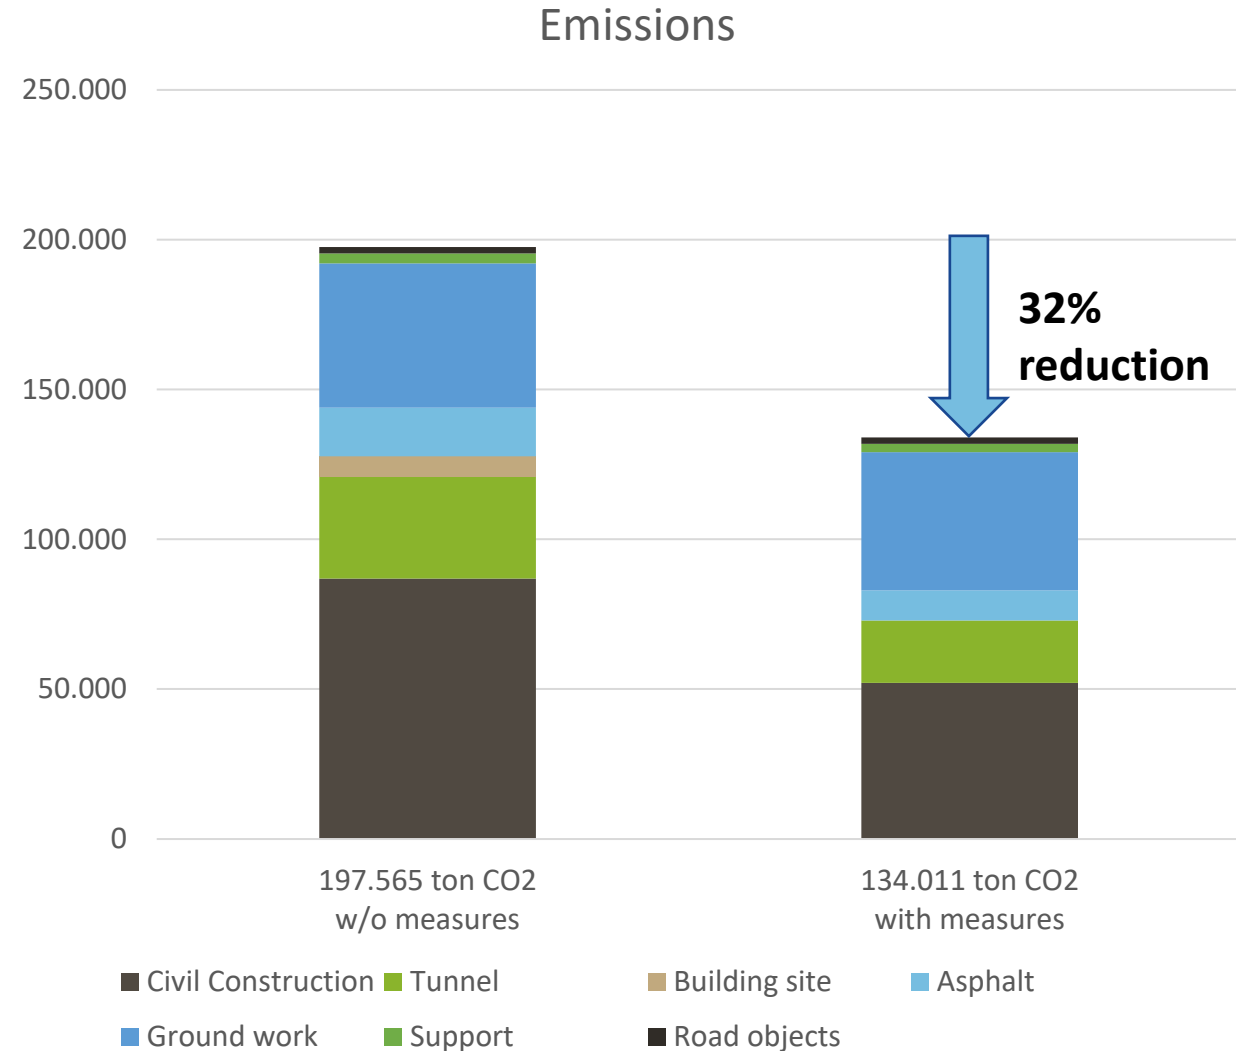

Actual CO₂ emissions

Emissions from start of work till Q3 2022

These are the emissions for Scope 1, 2 and 3 combined

Goal: Reducing the emissions of the realisation phase with **23%***

*true emissions compared to the planning without reduction measures.

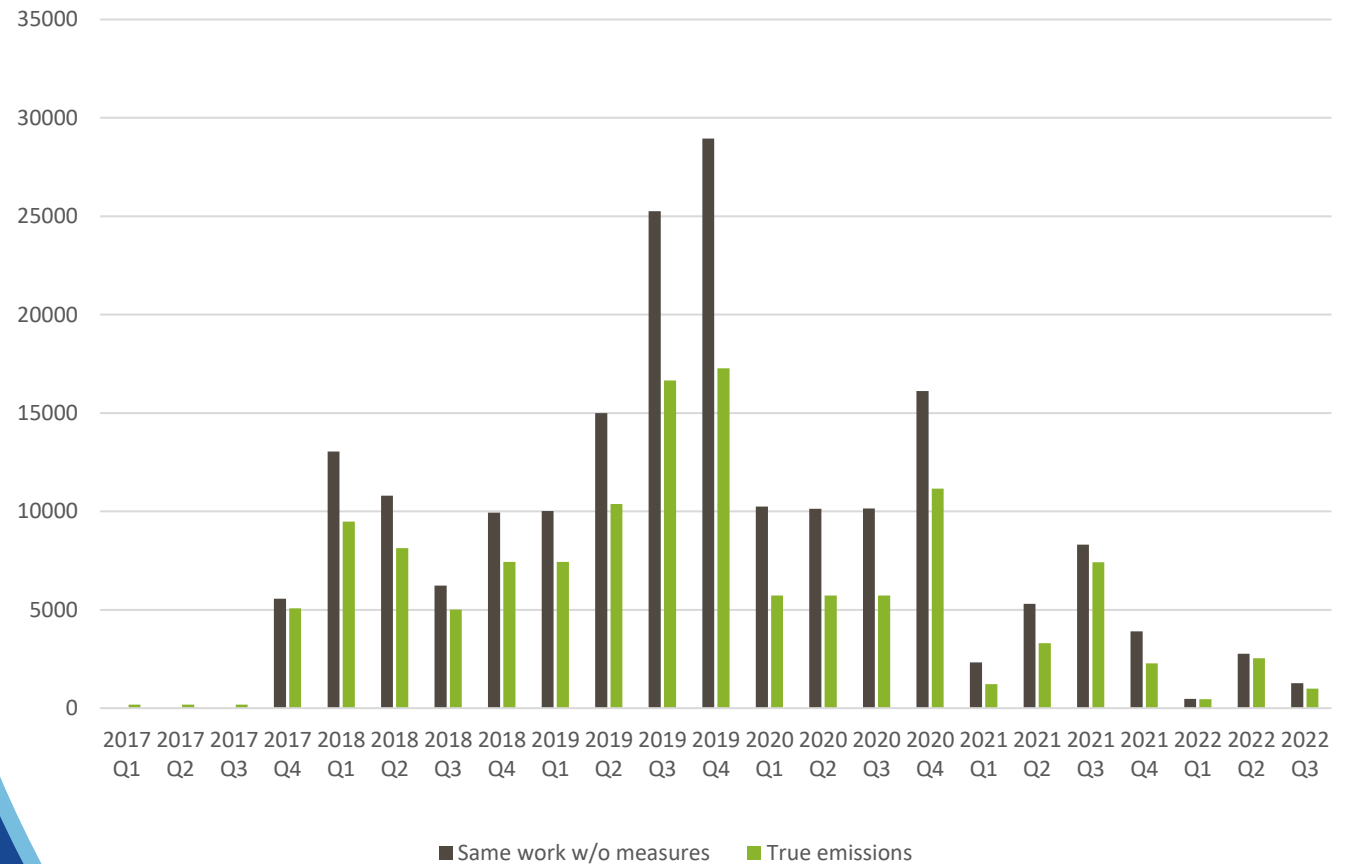

CO₂ emissions over time

Emissions from start of work till Q3 2022

Goal: Reducing the emissions of the realisation phase with **23%***

*actual emissions compared to the planning without reduction measures.

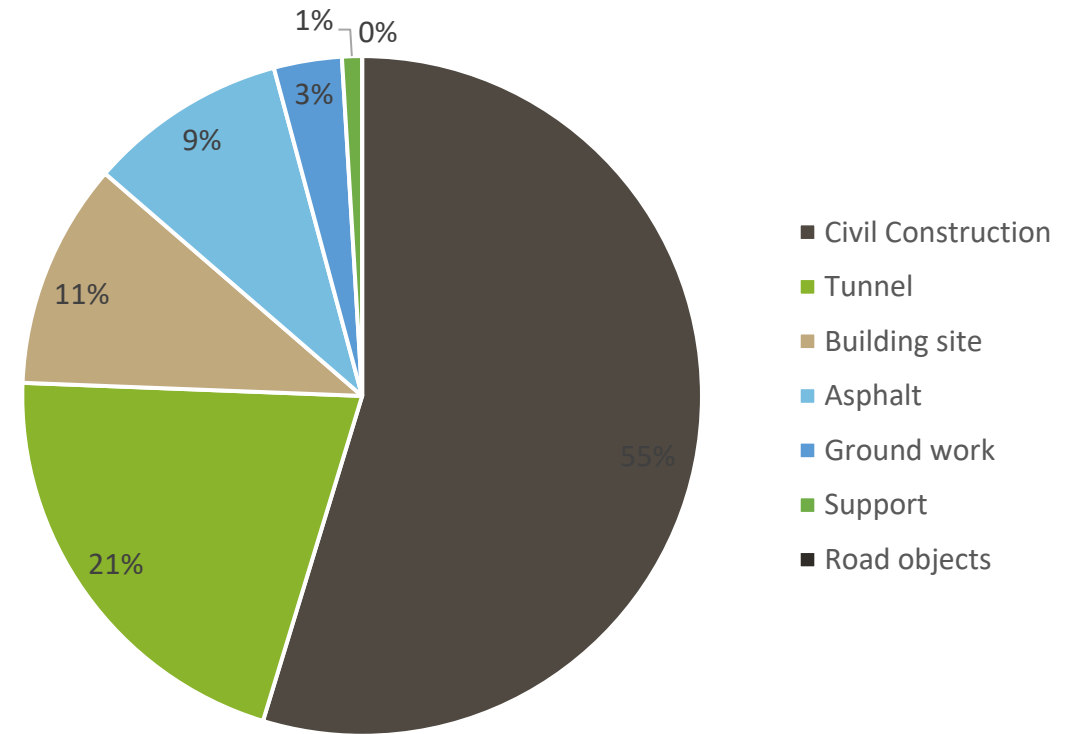

Emissions over time

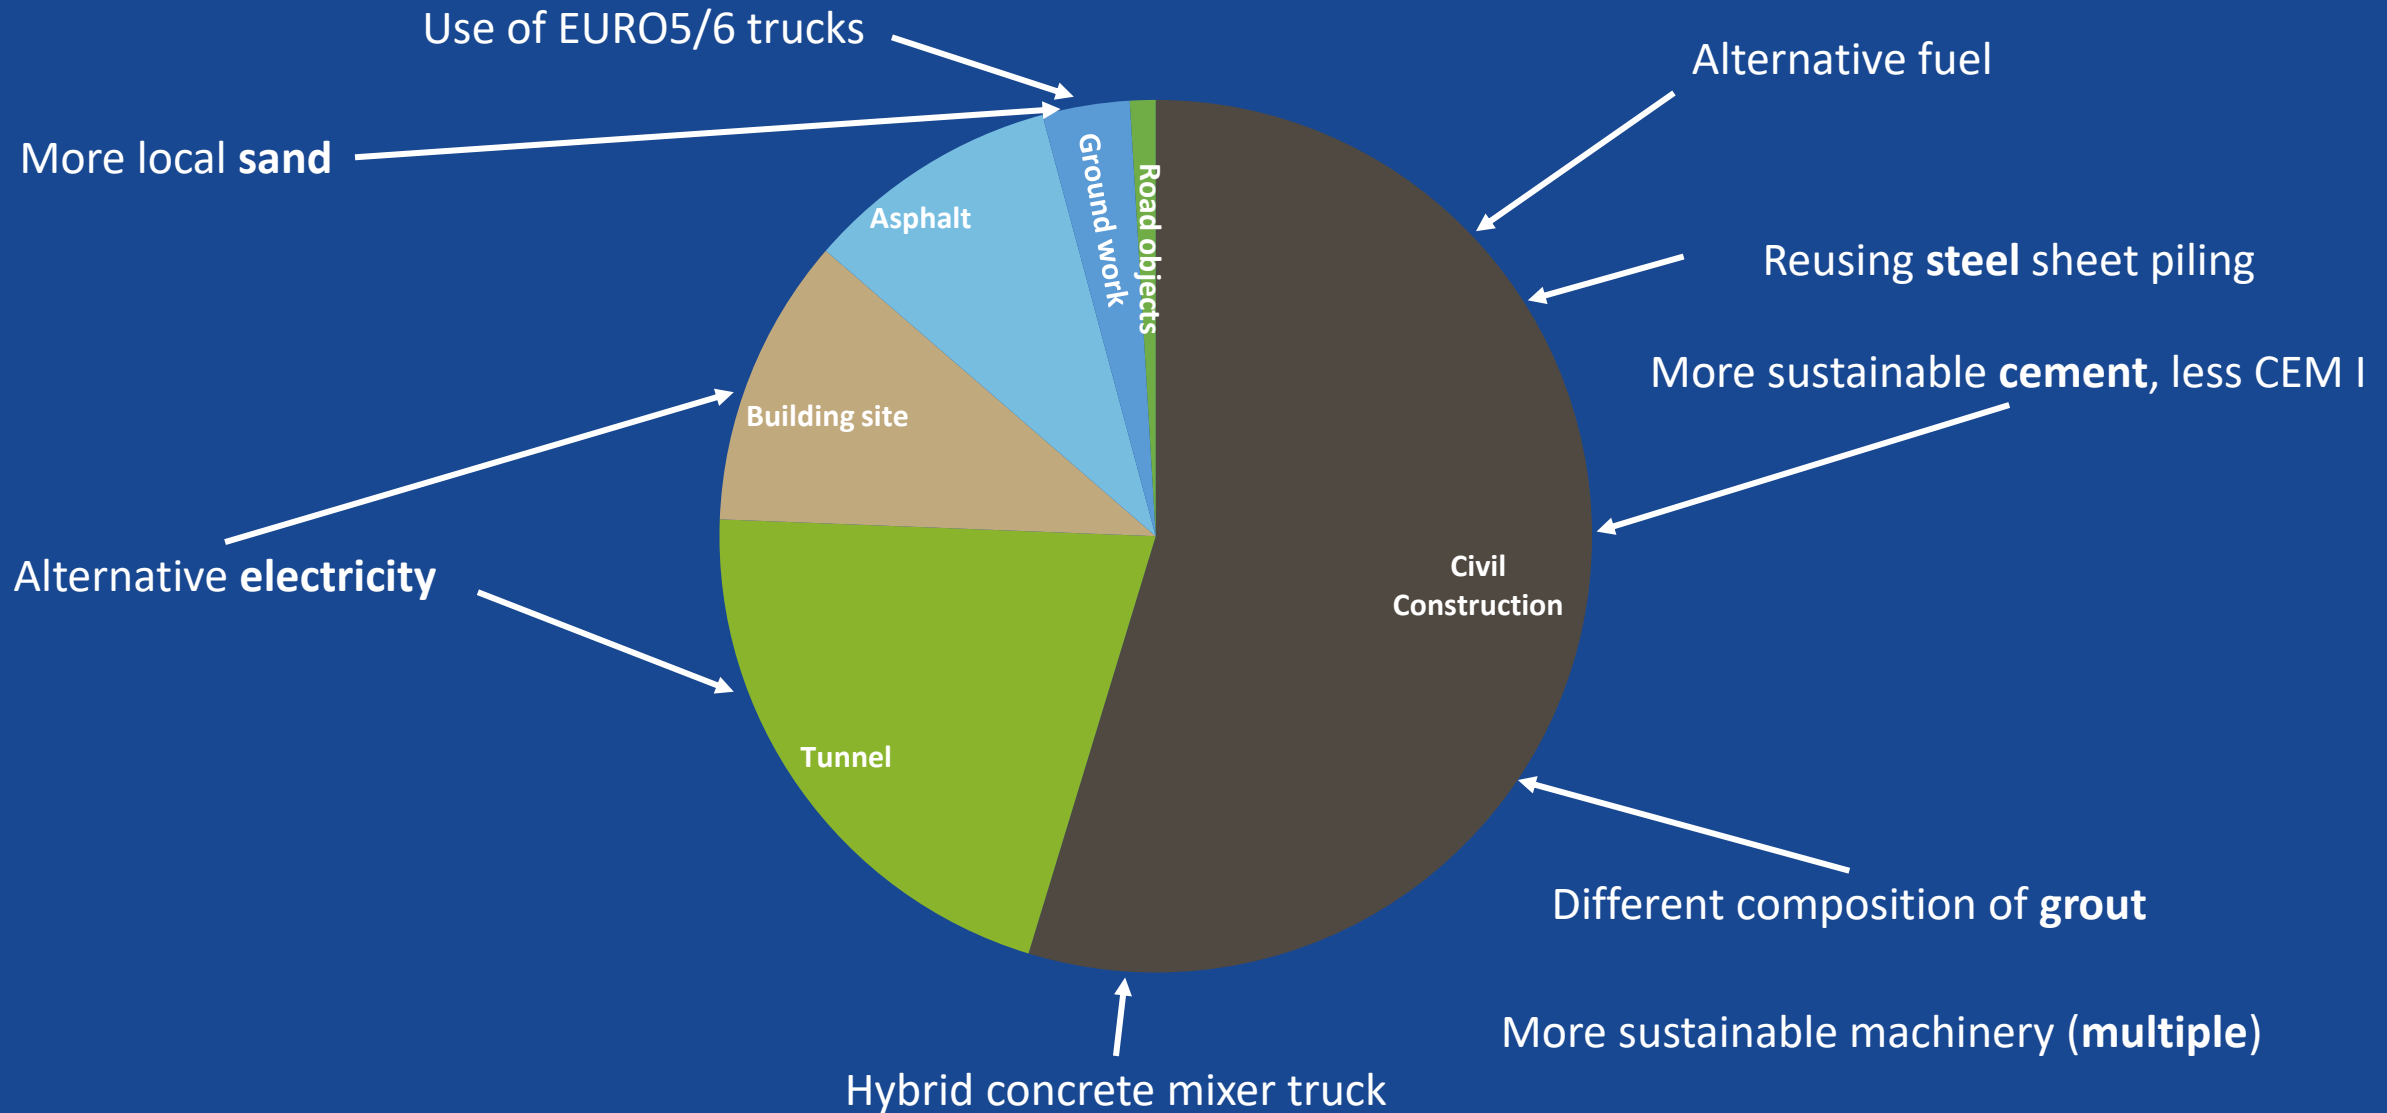

CO₂ reduction

True emissions compared to industry standard

Reduction (total 63.554 tonnes CO₂)

A few CO₂ reduction measures

Working on sustainable solutions together

We are continually looking for new sustainable measures. We try to be a soundboard for the Province Zuid Holland to continually improve our sustainability but also the sustainability of the finished product.

We are now looking into a more sustainable methods of the road and tunnel maintenance.
